Personal website

PERSONAL

Ever since a young age, I had a desire to create. When I discovered programming whole new world of possibilities opened for me. I started by making a few video games in Unity, then learned the basics of artificial intelligence, and finally found web development to be the best way to create things I always wanted. I am always looking forward to challenges that will test my abilities and improve myself.

EDUCATION

Professional engineer in electrical and computer engineering | ICT college of vocational studies
2018 – 2021
Telecommunication Electrical Engineer | Middle Technical PTT School
2014 – 2018

PROJECTS

My portfolio| HTML, CSS, Javascript, AJAX, PHP, MySQL | Source code
Personal website that I use to show my projects, skills, and blogs to people interested in it. In this project, I learned how PHP works without any framework.

Clothyy| HTML, CSS, Javascript, Python Django Framework, MySQL | Source code
E-commerce website for buying clothes. Website has features like shopping cart, search for product, stripe payments, login, register, filtering, and chekout.

Landy| HTML, CSS, Javascript, AJAX, JSON | Source code
Website for people searching for real estate. You can sort, filter and search for things you want to find. I made these things possible using JSON for data and AJAX for delivering data. Users can also add products to the favorites section.

Read and Write | HTML, CSS, Django Framework, SQLite | Source code
Read and Write is a website for bloggers. When a user is registered and logged he can make his blogs, like, view and comment on other blogs, see his stats. Users can also get premium accounts and get their blogs on the first page.

SKILLS

- PHP
- Javascript, Jquery Library
- Python, Django Framework
- HTML, CSS
- C#, .NET
- MySQL, SQLite
